## IN THIS ISSUE: GLOBAL TO REGIONAL, STRATEGIC TO TACTICAL

---

### World Economic Forum

GRF CEO Mark Orsi served as a contributor to the WEF white paper [Cyber Resilience Index: Advancing Organizational Cyber Resilience](#) which provides public and private sector leaders with a common framework for sound organizational cyber resilience. Mark offered insight into collaboration on threat information sharing and threat mitigation. He proposed that organizations work with industry peers and policy makers, establish sharing agreements with ecosystem partners, and stressed the need for agreed upon processes and expectations on what can and cannot be shared by partners.

### Atlantic Council

Orsi also joined the Atlantic Council for a [discussion on energy security](#). He covered threats faced by the sector due to increased connectivity and complexity, but also opportunities to enhance security that should be coupled with energy transition. Mark discussed efforts by the Business Resilience Council to develop third-party and supply-chain resilience, and to build an Operational Resilience Framework supporting recovery of critical services in the face of attacks.

### K12 SIX

Regional Director Eric Lankford recently presented *Cyber Resilience 101: A Non-Technical Guide for Districts of Any Size* to the Colorado Association of School Executives. The session helped district leaders outside of IT gain a better understanding of the current risk landscape and offered some simple precautionary steps, regardless of school size or sophistication, for better preparation against a cyber incident.

## The Cyber Resilience Index: Advancing Organizational Cyber Resilience

WHITE PAPER  
JULY 2022

### K12 SIX cont.

Join K12 SIX at 2pm ET on August 16 for the webinar [The Long Tail of K-12 Cyber Incident Response and Recovery](#). The webinar will offer an extended case study of the long-term cyber incident response and recovery work of Northshore School District in Bothell, WA, which experienced a significant cyber incident in 2019.

### LS-ISAO

During ILTA's October 10-12 [LegalSEC Summit](#), LS-ISAO will present *Crowdsourcing Threat Intel: Stronger Together*. LS-ISAO President and CEO Mark Orsi and Director of Intelligence Jaquar Harris will give an overview of the legal sector's cyber threat landscape and discuss how crowd sourcing intelligence can help firms defend themselves against attacks.

### MFG ISAC

Tim Chase, Program Director of Manufacturing ISAC, presented the talk [Ransomware Targeting Manufacturing](#) to the Pacific Northwest Defense Coalition (PNDC). PNDC is an association of defense and security industry businesses focused on the region's economy and the nation's security through training, counseling, networking, and advocacy.

## OT-ISAC

The inaugural Women in OT organized by OT-ISAC and Cyber Security Agency of Singapore (CSA) kicked off on the evening of July 14 with candid information sharing. Hailing from the US, Europe and Asia, respectively, were Maggie Powell of Amazon Web Services, Sarah Fluchs of Admeritia GmbH, and Ong Chen of BizTech Group. Moderated by Jane Lo of MySecurityMedia, the panelists gave insight into their extensive experience in Operational Technology (OT) and shared their personal stories. Refreshing views, career tips and common themes emerged from the exchange.

The OT-ISAC Summit will feature training sessions at the September 7-8 event at the voco Orchard Singapore:

-*Leveraging Assessments to Drive OT Risk Reduction* from instructor Jason Dely, Director ICS Solutions at NetRise & ICS Senior Technical Advisor at SANS Institute

-*OT Training Awareness* from instructor Richard Bussiere, Technical Director at Tenable

-*Security by Design Strengthens the Resilience in Industrial Plants* from instructor Daniel Ehrenreich, Lecturer & Secure Communications and Control Expert

## DEFCON

Saturday August 13, representatives from MFG ISAC, ONG-ISAC and DNG-ISAC will present *Keeping Beer Cold: Attackers, ICS and Cross-Sector Defense* to the audience at the DEFCON ICS Village in Caesars Forum. Tim Chase, Roderick Austin and John Bryk will draw back the curtain on intelligence, actions and processes surrounding ICS threats and vulnerabilities. The discussion will set the stage for the question of what attendees would target and how enterprises and sharing communities should react to stop intrusions.

## BRC

The Business Resilience Council has extended its offerings beyond alerts and reports on systemic physical and cyber risks. It now tracks significant vulnerabilities and breaches, and provides the means to connect with product and security teams of vendors that support essential business services. When a threat is imminent, or an incident occurs, these vendor connections become vital to BRC members' cybersecurity and continuity teams, for situational awareness and rapid response. The BRC also works with breached vendors to facilitate dialogue with the community, for mutual benefit.

The BRC just held the webinar Grid Resilience vs. Climate Change with Andy Bochman, Senior Grid Strategist for National & Homeland Security at Idaho National Labs. Andy spoke on climate change, the threats it brings and the likely impact to the grid and businesses. The meeting also featured a geopolitical and cybersecurity update.
